PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in Flutter and Android application development. Experienced in building mobile applications using Dart, Kotlin, Java, Firebase, and REST APIs through academic projects, internships, and personal learning. Completed internships in software development, Flutter development, and frontend web development. Currently developing an AI-powered real-time translation video conferencing platform as a Final Year Project. Passionate about mobile app development, modern frontend technologies, and continuous learning.

PROFESSIONAL EXPERIENCE

Associate Software Engineer Intern

Techlogix (Pvt.) Ltd., Lahore

06/2025 – 09/2025

Lahore, Pakistan

- Worked on enterprise-level digital banking solutions using Oracle Digital Banking Experience (OBDX).
- Contributed to application development using Java and REST APIs.
- Assisted in frontend and backend module development.
- Worked with Oracle Database and reporting-related components.
- Collaborated with senior developers on debugging and issue resolution.

Android Development Trainee

NAVTTTC, Lahore

07/2024 – 10/2024

Lahore, Pakistan

- Developed Android applications using Kotlin, Java, Firebase, and REST APIs.
- Learned Android application architecture and lifecycle management.
- Implemented authentication and database integration features.
- Performed testing and debugging of Android applications.

Flutter Developer Intern

Developer'sHub Corporation

04/2026 – 05/2026

Lahore, Pakistan

Remote Internship

- Developed mobile application features using Flutter and Dart.
- Worked on UI implementation and application functionality.
- Collaborated with mentors and team members during development tasks.
- Gained practical experience in Flutter development workflows.

Frontend Web Developer Intern

Arcana Info (Pvt.) Ltd., Lahore

07/2023 – 08/2023

Lahore, Pakistan

- Developed responsive web interfaces using HTML, CSS, and JavaScript.
- Assisted in improving user interface responsiveness.
- Worked on frontend implementation tasks and bug fixing.

SKILLS

Programming Languages

- Dart
- JavaScript
- Java
- Kotlin
- Python
- C#
- SQL

Frontend Development

- React.js
- Tailwind CSS
- HTML5
- CSS3
- Responsive Web Design

Tools & Technologies

- GitHub
- Android Studio
- VS Code
- IntelliJ IDEA
- Figma
- N8n automation
- Oracle Digital Banking Experience (OBDX)

Software Architecture & Design

- Component-Based Architecture
- Atomic-Based Architecture
- MVVM Architecture (Feature base)
- Monolithic Architecture (Moderate Understanding)
- Distributed Systems (Academic Exposure)

Mobile Development

- Flutter
- Android Development
- Firebase Authentication
- Firebase Firestore
- REST API Integration
- State Management
- XML UI Design

Databases

- MS SQL
- PostgreSQL (Basic Understanding)
- Oracle Database
- Firebase Firestore
- Supabase

Core Concepts

- Object-Oriented Programming (OOP)
- Basics of DSA
- API Integration
- Local Storage
- Authentication Systems
- JWT Authentication (Basic Understanding)
- Debugging
- Version Control

FINAL YEAR PROJECT

Final Year Project

AI-Powered Real-Time Translation Video Conferencing Platform

Technologies: React.js, Socket.io [↗](#), WebRTC, FastAPI, Supabase, Python, Hugging Face NLLB-200

- Developing a video conferencing platform capable of real-time English-to-Urdu and Urdu-to-English translation.
- Integrating speech recognition, machine translation, and speech synthesis workflows.
- Implementing real-time communication using WebRTC and Socket.io [↗](#).
- Focused on delivering accurate translations with minimal latency.
- Working on user-friendly communication experiences across different languages.

PROJECTS

Personal Portfolio Website [↗](#)

Technologies: React.js, Tailwind CSS, Framer Motion, JavaScript, Vercel

- Developed a modern and responsive developer portfolio to showcase projects, skills, and professional experience.
- Built reusable React components with modern UI animations and responsive layouts.
- Deployed the application on Vercel with a focus on performance and user experience.

EcoScan

Technologies: Flutter, Dart

- Developed a Flutter application for identifying recyclable items through image scanning.
- Implemented recycling guidance, reward points, and eco-awareness features.

E-Commerce Shopping App

Technologies: Flutter, Firebase

- Developed an e-commerce application with authentication, product browsing, and cart functionality.

- Integrated Firebase and cloudinary services and responsive UI.

Flutter OCR App

Technologies: Flutter, OCR

- Built an OCR application for extracting text from images.
- Implemented local storage for scanned results.

Life Beacon – SOS Emergency App (Academic Project)

Technologies: Java, Firebase, Twilio API, fusedLocationProvider Library

- Developed an Android emergency assistance application with SOS alerts and live location sharing.
- Integrated Firebase and Twilio API for emergency notifications.

Wallpaper App & Admin App

Technologies: Kotlin, Firebase

- Developed a wallpaper application with category-based wallpaper browsing.
- Built an admin application to manage wallpaper uploads and updates using Firebase.

My-To-Do App

Technologies: Kotlin, Firebase Authentication, Firebase Firestore

- Developed a task management application using Firebase Authentication and Firestore.
- Implemented Google Sign-In, CRUD operations, and multi-language support.

Inventory Management System (Academic Project)

Technologies: C#, .NET Framework, MS SQL Server, Visual Studio

- Developed a desktop-based inventory management system using C#, .NET, and MS SQL Server.
- Implemented CRUD operations, stock management, and relational database integration.

Amazon Product Sentiment Analysis (Academic Project)

Python, NLP, Machine Learning, Data Science

- Performed data cleaning, preprocessing, and exploratory data analysis on Amazon product reviews.
- Applied NLP and machine learning techniques for sentiment classification.

Text Summarizer (Academic Project)

Technologies: Python, NLP

- Developed a Python-based text summarization tool using NLP techniques.
- Generated concise summaries from lengthy text documents.

EDUCATION

Bachelor of Science in Computer Science

University of Engineering and Technology (UET), Lahore
Final Semester (Result Awaited)

12/2022 – 06/2026
Lahore, Pakistan

CERTIFICATES

Mobile Application Development

NAVTTTC | 2024

Introduction to Generative AI

Simplilearn SkillUp | 2025
